

TEXON FASHION MATERIALS

Jeans Material Label Solutions

Texon International extends its structural materials manufacturing technology to the apparel industry by the introduction of different pulp fibre blends. Jeans label material is made out of natural cellulose fibre and non-woven impregnated felt that can be latex impregnated. It can be printed, laminated, coated, screen-printed to suit customer's requirement. It is used by many of the finest jeans manufacturers around the world.

Benefits of Texon® Jeans Label

Texon Jeans label material is used as a high quality base material for the printing of jeans labels. It has high stitch strength, abrasion resistance and flexibility. This results in the material being hardwearing and very durable.

- Retains its quality even after printing
- Withstands stonewash process, can be washed and dry-cleaned
- Dimensionally stable, will not shrink or stretch
- Lightweight
- Good abrasion resistance
- Can be easily stitched onto jeans
- Leather-like touch and feel

Technical Details

Product Code

Texon T484

Standard sheet size:

100 x 150 cm

Rolls:

150cm (wide) & 50m (length) at minimum

Thickness:

0.4mm, 0.55mm and 0.8mm

Colour:

Brown, Sahara, Gobi, Black, White, Stone, Sierra, Taiga, Dark Ivory.
